

MODULE SPECIFIC ADJUSTMENT PROCEDURES

The bag pile under the **pick-up unit**, the bag on the **feed conveyor** and the bag in the **bag openers** must all be centered with the **spout**. Thus, when the **bag dispenser** and the **spout** need adjustment, start by adjusting the **spout**.

If you need to re-adjust the spout, don't forget to check if the bag dispenser also needs to be re-adjusted.
